Professional Summary

Results-driven **Java Backend Developer** with **over 2 years** of experience at Nisum, specializing in designing and deploying scalable, high-performance applications. **Strong expertise in developing applications using Java 8/11**, microservices architecture, and RESTful APIs. Adept in leveraging **Spring Framework (Spring Boot, Spring MVC)** and **Hibernate ORM** to build reliable backend solutions. Demonstrated proficiency in automated testing, including **JUnit 5** and **Mockito**. Known for analytical skills and problem-solving.

Professional Experience

Nisum, Java Backend Developer | Hyderabad, India | Aug 2022 - Present

- Developed and optimized the "Schedule & Save" platform for Albertsons' eCommerce site, enhancing user engagement by **35%** and increasing sales by **20%**.
- Enhanced codebase and **optimized response times**, reducing application latency by **60%**, improving user satisfaction.
- Contributed to a **greenfield project** to build an in-house platform from the ground up, resulting in annual client savings of approximately **\$1M** by eliminating third-party dependencies.
- **Developed and integrated RESTful APIs** with **Spring Boot** for seamless data handling and communication.
- Used **Spring MVC and Hibernate** for managing complex business logic and data persistence.
- Maintained high code quality with **TDD** using **JUnit 5** and **Mockito**.
- Participated in the **CI/CD pipeline** development, deploying using **Docker** and **Kubernetes** for container orchestration.
- Engaged in using **version control systems** like **Git** for code management.
- Experienced in **AWS** and **Azure** for cloud-based solutions.
- Demonstrated strong **analytical skills** and attention to detail for technical problem-solving.

Skills

Programming Languages: Core Java, Java 8/11/17, Python, SQL, Data Structures, Algorithms.

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Web Flux, Spring Cloud, Hibernate ORM, Kafka, Scikit-learn.

Tools & Technologies: Git, Maven, Docker, Kubernetes, MongoDB, MS SQL, PostgreSQL, Azure, Nginx.

Concepts: Microservices architecture, RESTful API design, Agile methodologies, **TDD**, CI/CD pipelines, DevOps practices.

Selected Projects

URL Shortener with Enhanced Analytics

- **Built**
- **Built** a full-stack URL shortener leveraging **Spring Boot** and **PostgreSQL**, supporting **1000+** daily unique requests and implementing **analytics dashboards** for usage insights.
- Improved scalability by integrating **Nginx** for load balancing and error handling, ensuring **99.9% uptime**.
- **Tech Stack:** Java 21, Spring Boot, PostgreSQL, Nginx, HTML, CSS, **Python for analytics**.
- **Link:** GitHub - URL Shortener

Smart Resume Picker (Ongoing)

- **Developed and implemented** a job portal handling over 500 applications monthly, enabling secure PDF resume uploads and automated processing.
- **Integrated a machine learning recommendation engine with 85% accuracy**, enhancing candidate-job role matching and improving HR efficiency.

- **Tech Stack:** Spring Boot, MySQL, Angular, **Scikit-learn**.
- **Link:** GitHub - Smart Resume Picker

Achievements

- Awarded the '**Excellence Award**' at Nisum for leading key projects and demonstrating innovative problem-solving skills.
- Received the '**Rockstar Award**' from the client for enhancing platform stability and ensuring seamless user experiences.

Education

Bachelor of Computer Engineering | Savitribai Phule Pune University | CGPA: 8.96/10
