Professional Summary

Java Backend Developer with 3 years of experience at Nisum, specializing in designing and deploying scalable, high-performance applications. Skilled in optimizing system performance and enhancing eCommerce platforms. Proficient in **Java, Python, and AI/ML concepts**, with hands-on experience in **Agile Scrum** environments. Strong background in developing robust APIs and improving system efficiency.

Professional Experience

Nisum, Java Backend Developer | Hyderabad, India | Aug 2022 - Present

- Spearheaded the development and optimization of the **Schedule & Save** platform for Albertsons' eCommerce site, driving a **35% increase in user engagement** and a **20% boost in sales**.
- Enhanced codebase efficiency, reducing application latency by **60%** and significantly improving user experience.
- Played a pivotal role in a **greenfield project** to create an in-house platform, saving clients **\$1M annually** by eliminating third-party dependencies.
- Designed and implemented **20+ APIs** for Safeway's eCommerce platform, reducing system downtime by **15%**.
- Developed **functional test cases** using **Docker TestContainer** to ensure application reliability in containerized environments.
- Authored and maintained **JUnit tests**, achieving **85%+ code coverage** to ensure code quality and reduce bugs.
- Addressed **Sonar and Veracode issues**, improving code quality and security, and reducing vulnerabilities by **30%**.
- Implemented third-party **payment gateway integrations** in the Payments module, enabling secure and seamless transaction processing.
- Developed **error-handling logic** to manage third-party API failures and ensure application **resilience and uptime**.
- Fixed code quality and security issues by addressing **SonarQube** and **Veracode** vulnerabilities, maintaining enterprise-level **compliance standards**.
- Leveraged **GitHub Copilot** to accelerate development and complete sprint stories ahead of schedule, improving team productivity and reducing development time.
- **Tech Stack:** Java 17, Reactive Programming, Microservices, Spring Web Flux, Spring Boot, MS SQL, NoSQL Kafka, GitHub CI/CD, Azure Kubernetes Services, Grafana, Spring Cloud, Docker TestContainer.

Skills

Programming Languages: Core Java, Java 8/17, Python, SQL, Data Structures, Algorithms (Solved 300+ in Leetcode), JSON.

Frameworks & Libraries: Spring Boot, Spring Web Flux, Spring Cloud, Kafka, Scikit-learn.

Tools & Technologies: Github, Maven, Docker, Azure Kubernetes Service, MongoDB, SQL Server, AWS, Nginx, Jira, Artifactory, Grafana.

Concepts: Microservices architecture, LLD, System Design, RESTful API design, Agile methodologies, MVC Framework, RAG, GenAI.

Personal Projects

URL Shortener with Enhanced Analytics

- Developed a full-stack URL shortener leveraging **Spring Boot** and **PostgreSQL**, handling **1000+ daily unique requests** and integrating **analytics dashboards** for usage insights.
- Improved scalability by implementing **Nginx** for load balancing and error handling.
- **Tech Stack:** Java 21, Spring Boot, PostgreSQL, Nginx, HTML, CSS, **Python for analytics**.

Banking Application With OAuth2

- Engineered a reactive banking application using **Spring Boot**, leveraging **OAuth 2.0** for secure authentication and authorization, ensuring scalability and high performance for real-time financial transactions.
- Managed the application on **Google Cloud Platform (GCP)**, utilizing services like Cloud Run, **Cloud SQL**, and Cloud Monitoring to ensure high availability, scalability, and cost-efficiency.
- **Tech Stack:** Tech Stack: **Spring Boot, Google OAuth 2.0, Multithreading, Prometheus, Grafana, GCP (Cloud Run, Cloud SQL, Cloud Monitoring), Docker, Kubernetes.**
- **Link:** github.com/Sion1407/FinFlow

Gen-AI Resume Chatbot

- Created an AI-driven chatbot using **FastAPI** and **Google Gemini API**, enabling real-time resume-based Q&A interactions.
- Hosted the backend on Render, ensuring seamless integration with a responsive frontend featuring animated prompts to enhance user engagement.
- **Tech Stack:** FastAPI, Google Gemini AI, Python, Render, HTML, CSS, JavaScript.
- **GitHub:** github.com/Sion1407/AI-Resume-Chatbot

Achievements

- Awarded the '**Excellence Award**' at Nisum for leading key projects and demonstrating innovative problem-solving skills.
- Received client appreciation for enhancing platform stability and ensuring seamless user experiences.

Education

Bachelor of Computer Engineering | Savitribai Phule Pune University | CGPA: 8.96/10
